

I am writing to let you know that I do not want the local Air One radio station (104.7 FM in Woodland, CA) to be replaced by a new Low Power FM station. This station is a FM translator service that reaches to neighboring areas such as Davis, Natomas and Sacramento. The content on this station is not only unique but positive and life changing. It has a message of hope through music, the deejays comments and the periodic messages from pastors and counselors. I have heard many testimonies as to how people have come to the saving knowledge of Jesus Christ and abandoned lifestyles filled with, alcohol, drugs and violence. This is a rare thing, considering that most stations today play songs with crude and suggestive lyrics and do not promote moral values that enrich rather than degrade the community. If this station was removed I believe it would be possible to see an increasing crime rate and moral degradation of the community, especially the young people. This music played on this station mostly appeals to teenagers and young adults and it is important that at this impressionable age, that they be provided with music that appeals to them and brings a positive and life changing message. This is making a positive difference in the community and will continue to do so. So in closing I would argue that this radio station is a valuable asset to the community and must not be replaced.
